This JAMB Syllabus for Economics aims to prepare the candidates for the Unified Tertiary Matriculation Examination (UTME).

# **General Objectives | JAMB Syllabus for Economics**

It is designed to test their achievement of the course objectives, which are to:

- 1. demonstrate sufficient knowledge and understanding of the basic concepts, tools and their general applications to economic analysis;
- 2. identify and explain the basic structures, operations and roles of the various economic units and institutions (national and international);
- 3. describe major economic activities production, distribution and consumption;
- 4. identify and appraise the basic and current economic problems of society;
- 5. develop the competence to proffer solutions to economic problems identified.

# Topic 1: Economics as a science

- a. Basic Concepts: Wants, Scarcity, choice, scale of preference, opportunity cost, Rationality, production, distribution, consumption.
- bi. Economic problems of: What, how and for whom to produce and efficiency of resource use.
- bii. Application of PPF to solution of economic problems.

### **Objectives**

Candidates should be able to:

- (i) compare various concepts in economics and their applications;
- (ii) interpret graphs/schedules in relation to the concepts;
- (iii) identify economic problems;
- (iv) proffer solutions to economic problems

# **Topic 2: Economic Systems**

- a. Types and characteristics of free enterprise, centrally planned and mixed economies
- b. Solutions to economic problems under different systems
- c. Contemporary issues in economic systems (economic reforms e.g deregulation, banking sector consolidation, cash policy reform).

#### **Objectives**

Candidates should be able to:

- (i) compare the various economic systems;
- (ii) apply the knowledge of economic systems to contemporary issues in Nigeria
- (iii) proffer solutions to economic problems in different economic systems.

# Topic 3: Methods and Tools of Economic Analysis

- a. Scientific Approach:
- i. inductive and deductive methods
- ii. positive and normative reasoning
- b. Basic Tools
- i. tables, charts and graphs
- ii. measures of central tendency: mean, median and mode, and their applications.
- iii. measures of dispersion; variance, standard deviation, range and their applications;
- iv. merits and demerits of the tools.

Candidates should be able to:

- (i) distinguish between the various forms of reasoning;
- (ii) apply these forms of reasoning to real life situations;
- (iii) use the tools to interpret economic data;
- (iv) analyse economic data using the tools;
- (v) assess the merits and demerits of the tools.

# **Topic 4: The Theory of Demand**

- a. i. meaning and determinants of demand
- ii. demand schedules and curves
- iii. the distinction between change in quantity demanded and change in demand.
- b. Types of demand: composite, derived, competitive and joint demand.
- c. Types, nature and determinants of elasticity and their measurement price, income and cross elasticity of demand.
- d. Importance of elasticity of demand to consumers, producers and government.

# **Objectives**

Candidates should be able to:

- (i) identify the factors determining demand;
- (ii) interpret demand curves from demand schedules;
- (iii) differentiate between change in quantity demanded and change in demand;
- (iv) compare the various types of demand and their interrelationships;
- (v) relate the determinants to the nature of elasticity;
- (vi) compute elasticities;
- (vii) interpret elasticity coefficients in relation to real life situations.

#### **Topic 5: The Theory of Consumer Behaviour**

- a. Basic Concepts:
- i. utility (cardinal, ordinal, total average and marginal utilities)
- ii. indifference curve and budget line.

- b. Diminishing marginal utility and the law of demand.
- c. Consumer equilibrium using the indifference curve and marginal analyses.
- d. Effects of shift in the budget line and the indifference curve.
- e. Consumer surplus and its applications.

Candidates should be able to:

- (i) explain the various utility concepts;
- (ii) apply the law of demand using the marginal utility analysis;
- (iii) use indifference curve and marginal analyses to determine consumer equilibrium;
- (iv) relate the income and substitution effects;
- (v) apply consumer surplus to real life situations.

# **Topic 6: The Theory of Supply**

- a. i. Meaning and determinants of supply
- ii. Supply schedules and supply curves
- iii. the distinction between change in quantity supplied and change in supply
- b. Types of Supply: Joint/complementary, competitive and composite
- c. Elasticity of Supply: determinants, measurements, nature and applications

### **Objectives**

Candidates should be able to:

- (i) identify the factors determining supply;
- (ii) interpret supply curves from supply schedules;
- (iii) differentiate between change in quantity supplied and change in supply;
- (iv) compare the various types of supply and their interrelationships;
- (v) relate the determinants to the nature of elasticity;
- (vi) compute elasticity coefficients;
- (vii) interpret the coefficients in relation to real live situations.

# **Topic 7: The Theory of Price Determination**

- a. The concepts of market and price
- b. Functions of the price system
- c. i. Equilibrium price and quantity in product and factor markets
- ii. Price legislation and its effects
- d. The effects of changes in supply and demand on equilibrium price and quantity.

#### **Objectives**

Candidates should be able to:

(i) explain the concepts of market and price;

- (ii) examine the functions of the price system;
- (iii) evaluate the effects of government interference with the price system;
- (iv) differentiate between minimum and maximum price legislation;
- (v) interpret the effects of changes in supply and demand on equilibrium price and quantity.

# **Topic 8: The Theory of Production**

- a. Meaning and types of production
- b. Concepts of production and their interrelationships (TP, AP, MP and the law of variable proportion).
- c. Division of labour and specialization
- d. Scale of Production:

Internal and external economies of scale and their implications.

- e. Production functions and returns to scale
- f. Producers' equilibrium isoquant-isocost and marginal analyses.
- g. Factors affecting productivity.

### **Objectives**

Candidates should be able to:

- (i) relate TP, AP and MP with the law of variable proportion;
- (ii) compare internal and external economies of scale in production and their effects;
- (iii) identify the types of production functions
- (iv) compare the different types of returns to the scale and their implications;
- (v) determine the firm's equilibrium position using the isoquant-isocost and marginal analyses.
- (vi) identify the factors affecting productivity.

#### **Topic 9: Theory of Costs and Revenue**

- a. The concepts of cost: Fixed, Variable, Total Average and Marginal
- b. The concepts of revenue: Total, average and marginal revenue;
- c. Accountants' and Economists' notions of cost
- d. Short-run and long-run costs
- e. The marginal cost and the supply curve of firm.

#### **Objectives**

Candidates should be able to:

- (i) explain the various cost concepts
- (ii) differentiate between accountants' and economists' notions of costs
- (iii) interpret the short-run and long-run costs curves
- (iv) establish the relationship between marginal cost and supply curve.
- (v) explain the various revenue concepts.

# **Topic 10: Market Structures**

- a. Perfectly competitive market:
- i. Assumptions and characteristics;
- ii. Short-run and long-run equilibrium of a perfect competitor;
- b. Imperfect Market:
- i. Pure monopoly, discriminatory monopoly and monopolistic competition.
- ii. Short-run and long-run equilibrium positions.
- c. Break-even/shut-down analysis in the various markets.

# **Objectives**

#### Candidates should be able to:

- (i) analyse the assumptions and characteristics of a perfectly competitive market;
- (ii) differentiate between short-run and long-run equilibrium of a perfectly competitive firm;
- (iii) analyse the assumptions and characteristics of imperfect markets;
- (iv) differentiate between the short-run and long-run equilibria of imperfectly competitive firms;
- (v) establish the conditions for the break- even/shut down of firms.

### **Topic 11: National Income**

- a. The Concepts of GNP, GDP, NI, NNP
- b. National Income measurements and their problems
- c. Uses and limitations of national income estimates
- d. The circular flow of income (two and three-sector models)
- e. The concepts of consumption, investment and savings
- f. The multiplier and it effects
- g. Elementary theory of income determination and equilibrium national income.

#### **Objectives**

# Candidates should be able to:

- (i) identify the major concepts in national income;
- (ii) compare the different ways of measuring national income;
- (iii) examine their problems;
- (iv) assess the uses and limitations of national income estimates;
- (v) interpret the circular flow of income using the two and three-sector models;
- (vi) calculate the various multipliers;
- (vii) evaluate their effects on equilibrium national income;
- (viii) explain the concepts of consumption, investment and savings.

# **Topic 12: Money and Inflation**

- a. Types, characteristics and functions of money
- b. Demand for money and the supply of money
- c. Quantity Theory of money (Fisher equation)
- d. The value of money and the price level
- e. Inflation: Types, measurements, effects and control
- f. Deflation: Measurements, effects and control.

#### Candidates should be able to:

- (i) explain between the types, characteristics and functions of money;
- (ii) identify the factors affecting the demand for and the supply of money;
- (iii) examine the relationship between the value of money and the price level;
- (iv) identify the components in the quantity theory of money;
- (v) examine the causes and effects of inflation;
- (vi) calculate the consumer price index;
- (vii) interpret the consumer price index;
- (viii) examine ways of controlling inflation.
- (ix) Examine the causes, measurement, effects and control of deflation.

### **Topic 13: Financial Institutions**

- a. Types and functions of financial institutions (traditional, central bank, mortgage banks, merchant banks, insurance companies, building societies);
- b. The role of financial institutions in economic development;
- c. Money and capital markets
- d. Financial sector regulations
- e. Deposit money banks and the creation of money
- f. Monetary policy and its instruments
- g. Challenges facing financial institutions in Nigeria.

#### **Objectives**

### Candidates should be able to:

- (i) Identify the types and functions of financial institutions;
- (ii) Explain the roles of financial institutions in economic development;
- (iii) Distinguish between the money and capital markets;
- (iv) Identify the various financial sector regulators and their functions;
- (v) Explain the money creation process and its challenges;
- (vi) Examine the various monetary policy instruments and their effects;
- (vii) Appraise the challenges facing the financial institutions in Nigeria.

## **Topic 14: Public Finance**

- a. Meaning and objectives
- b. Fiscal policy and its instruments
- c. Sources of government revenue (taxes royalties, rents, grants and aids)
- d. Principles of taxation
- e. Tax incidence and its effects
- f. The effects of public expenditure
- g. Government budget and public debts
- h. Revenue allocation and resource control in Nigeria.

#### Candidates should be able to:

- (i) identify the objectives of public finance;
- (ii) explain fiscal policy and its instruments;
- (iii) compare the various sources of government revenue
- (iv) analyse the principles of taxation;
- (v) analyse the incidence of taxation and its effects;
- (vi) examine the effects of public expenditure on the economy;
- (vii) examine the types and effects of budgets;
- (viii) highlight the criteria for revenue allocation in Nigeria and their impact.

# **Topic 15: Economic Growth and Development**

- a. Meaning and scope
- b. Indicators of growth and development
- c. Factors affecting growth and development
- d. Problems of development in Nigeria
- e. Development planning in Nigeria.

# **Objectives**

#### Candidates should be able to:

- (i) distinguish between economic growth and development;
- (ii) highlight the indicators of growth and development;
- (iii) identify the factors affecting growth and development;
- (iv) examine the problems of development in Nigeria;
- (v) examine the role of planning in development.

# **Topic 16: Agriculture in Nigeria**

- a. Types and features;
- b. The role of agriculture in economic development;
- c. Problems of agriculture;

- d. Effects of agricultural policies and their effects;
- e. Instability in agricultural incomes (causes, effects and solutions).

Candidates should be able to:

- (i) identify the types and features of agriculture;
- (ii) examine the characteristics and problems of agriculture;
- (iii) assess the role of agriculture in economic development;
- (iv) appraise agricultural policies in Nigeria;
- (v) evaluate the causes and effects of instability in agricultural incomes.

# **Topic 17: Industry and Industrialization**

- a. Concepts and effects of location and localization of industry in Nigeria;
- b. Strategies and Industrialization in Nigeria;
- c. Industrialization and economic development in Nigeria;
- d. Funding and management of business organization;
- e. Factors determining the size of firms.

### **Objectives**

Candidates should be able to:

- (i) differentiate between location and localization of industry;
- (ii) identify the factors influencing the location and localization of industry;
- (iii) examine the problems of industrialization;
- (iv) appraise some industrialization strategies;
- (v) examine the role of industry in economic development.

# **Topic 18: Natural Resources and the Nigerian Economy**

- a. Development of major natural resources (petroleum, gold, diamond, timber etc);
- b. Contributions of the oil and the non-oil sectors to the Nigerian economy;
- c. Linkage effects;
- d. Upstream/downstream of the oil sector;
- e. The role of NNPC and OPEC in the oil sector;
- f. Challenges facing natural resources exploitation.

## **Objectives**

Candidates should be able to:

- (i) trace the development of the major natural resources in Nigeria;
- (ii) assess the contribution of the oil and the non-oil sectors to the Nigerian economy;
- (iii) establish the linkages between the natural resources and other sectors;
- (iv) analyse the environmental effects of exploitation activities in Nigeria;

- (v) distinguish between the upstream and downstream activities in the oil sector;
- (vi) examine the roles of NNPC and OPEC in the oil sector;
- (vii) suggest ways of controlling the effects of natural resources exploitation.

### **Topic 19: Business Organizations**

- a. Private enterprises (e.g. sole-proprietorship, partnership, limited liability companies and cooperative societies)
- b. Problems of private enterprises;
- c. Public enterprises and their problems;
- d. Funding and management of business organizations;
- e. Factors determining the size of firms;
- f. Privatization and Commercialization as solutions to the problems of public enterprises.

# **Objectives**

Candidates should be able to:

- (i) compare the types and basic features of private business organization;
- (ii) assess the financing and management problems of business organizations;
- (iii) identify the features of public enterprises;
- (iv) identify the factors determining the size of firms;
- (v) differentiate between privatization and commercialization;
- (vi) compare the advantages and disadvantages of privatization and commercialization.

# **Topic 20: Population**

- a. Meaning and theories;
- b. Census: importance and problems.
- c. Size and growth: over-population, under-population and optimum population.
- d. Structure and distribution;
- e. Population policy and economic development.

# **Objectives**

Candidates should be able to:

- (i) analyse some population theories:
- (ii) examine the relevance of the theories to Nigeria;
- (iii) examine the uses and limitations of census data;
- (iv) identify determinants of the size, composition and growth of population;
- (v) analyse the structure and distribution of population;
- (vi) appraise government population policy in Nigeria.

# **Topic 21: International Trade**

- a. Meaning and basis for international trade (absolute and comparative costs etc)
- b. Balance of trade and balance of payments: problems and corrective measures;
- c. Composition and direction of Nigeria's foreign trade;
- d. Exchange rate: meaning, types and determination.

Candidates should be able to:

- (i) examine the basis for international trade.
- (ii) differentiate between absolute and comparative advantages;
- (iii) distinguish between balance of trade and balance of payments and their corrective measures;
- (iv) highlight the problems of balance of payments and their corrective measures;
- (v) examine the composition and direction of Nigeria's foreign trade;
- (vi) identify the types of exchange rates;
- (vii) examine how exchange rates are determined.

### **Topic 22: International Economic Organizations**

Roles and relevance of international organization e.g. ECOWAS, AU, EU, ECA, IMF, EEC, OECD, World Bank, IBRD, WTO, ADB and UNCTAD etc to Nigeria.

# **Objectives**

Candidates should be able to:

- (i) identify the various economic organizations and their functions;
- (vii) evaluate their relevance to the Nigerian economy.

# **Topic 23: Factors of Production and their Theories**

- a. Types, features and rewards;
- b. Determination of wages, interest and profits;
- c. Theories: marginal productivity theory of wages and liquidity preference theory;
- d. Factor mobility and efficiency;
- e. Unemployment and its solutions

#### **Objectives**

Candidates should be able to:

- (i) identify the types; features and rewards of factors;
- (ii) analyse the determination of wages, interest and profits;
- (iii) interpret the marginal productivity of liquidity preference theories
- (iv) examine factors mobility and efficiency;

- (v) examine the types and causes of unemployment in Nigeria;
- (vi) suggest solutions to unemployment in Nigeria.
